COMMITTEE MEETING MINUTES

ATTENDEES: O’Connor*, Oswald, Jacobson, Ingram, Prahl, Reed, J. Bebrin, Wells, Duva*, Skumatz

1. Public Comment - None

2. Approval of Minutes from December 2018 - EVOTE

3. Non-Project Updates and Issues 10 min
   a. Review Interim progress / highlights;
      • Interim e-votes and meetings (see bottom of agenda) – Nov/Dec minutes & invoices approved; in-person and follow-up call on 3 year plan; evaluation committee vote and EEB Vote; approval of RFP process.
      • Upcoming meetings – 1634 budget issue call and NEI presentation
      • Status of Data requests and deliverables – Timeline report discussion
        1. Note C1634 memos – and need to schedule a call – will schedule a call / no Jennifer on this and next month’s meeting, so separate meeting. Talks about dollars, and if further delays, it will further affect calls. Want call end of this week or early next week. Questions – should they raise questions they have now? Skumatz not as qualified to answer as Jennifer. Instead suggested sending via email. Questions – these are “extra” costs – do we get initial estimates of costs? Maybe they’re too rosy. Hardly ever broken out that way. Team considering how to handle in the new RFPs.

   b. SERA team invoice – December already approved / voted / No action

4. Discussion of RFP / Walk Through; follow-up review by committee
   a. Reminder of process
   b. Walk-through of document content (document to follow by tomorrow) – 3 pieces right now. Reminded UI need for word version of T&C / needed within a week. Document has 2 objectives – soliciting for individual projects and for research areas (3 years). Send out document tomorrow / next couple days for comment, with 1 week review. Mandatory intent to bid to ID problems. Questions due same day / responses to those who submitted intent to bid. Intent to bid form. 3 research pools – res, commercial, survey-only (to help
keep costs for surveys competitive/advantageous to state). Requiring 2 sets of names for each firm because of communication issues last time. 12 individual 2019 projects plus pools content. Document discusses requirements for evaluation process. One place for the format and page lengths for submittals. Next section is individual project RFPs with consistent descriptions. T&C exceptions – and a reminder that the utilities are not likely to accept many exceptions. Format for budget and survey cost submittals and staffing rates for all research area submittals as well. In RFP we talk about scopes, deadlines, and also mention clearly the steps required in the CT process, including communication, data, and invoicing. Coming out for review by committee tomorrow.

c. Next steps / schedule

5. Discussion of Projects (Gantt, Project Summary Reports Provided monthly w/spend)
   a. Jacobson – C1635 – EO Impact – recruiting of winter sites underway, 2 have been difficult to reach. Working on getting back to non-weather dependent lighting and have a plan for Jan/Feb. Brought extra people in to keep up. Watch in future – will talk about upstream lighting sites that were put off because there were changes in vendors, but as put the site visits off, the program also was closed down for budget reasons so will revisit strategy there.
   b. C1634 – surveys are underway – 12/5 and 1/2 reached out to utilities to get better contact info especially for the largest sites, and hoping to get that info to help with recruitment. A few contacts may be responsible for multiple sites, so that would really help. Uncharacteristically low response rates and won’t make quotas. Comment – should not be considered a standard data issue – utility provided the contact info they had for the projects. This is collecting additional data on revised customer contacts (turnover, etc.) / agreed. Do they offer incentives for responses? Not un-standard for non-participants; less common for participants but world is changing. Tends to be more common in residential than C&I. Must consider, given these 70 projects make difference in whether the work is statistically significant or not, it is worth exploring. Note that the people we are reaching are gate-keepers, not the decision-maker. Look for other names in the project files perhaps (signatures on forms, etc.). Look beyond. Tend not to scour all data for this type of study (NTG) but that is what the utility is now doing. Look into most cost-effective way to reach needed sample size. Note account managers deal with bill-payers, not decision-makers.
   c. Residential – Skumatz – 3 linked projects – Lighting impact, RASS, and MF project. In same state – needed data for weighting to make data from survey and on-site responses representative for the state. Pursued best solutions, but data requirements harder for utilities. Used data call / jointly came up with reasonable approach to how to address given data constraints. Now settled; expect 3 reports to come fairly close together within next 2 months, for review.
   d. R1613/14 complete – presentation and data. Discussion – need good repository for evaluation data that is confidential but can be accessed. Craig and Taren will help Lisa follow-up. Skumatz concern about data issues and utilities / not want more data requirements on them. A secure link on the CTEEB website would be preferred.
   e. R1617 – have reviewed savings tool/ were expecting report, but based on past experience, EA Team will need time for review and revisions to the draft. We will keep pushing on this project report.
   f. Res new construction project is complete.
   g. NEI report is posted and final presentation is scheduled.
   h. HES impact evaluation – Skumatz didn’t do data sheet review earlier in the meeting. This is a good time to go through it in relation to this project. For this project, got data with problems initially; got revised data, and had to rerun all the gas and electric models / now
done. Next stage is the “drill down” on causal factors for differences. Went into data issues.

6. Data issues report: 1634 a meeting coming up. 1635 EO was discussed enough (Error - new project manager is a wrong entry – it is 1644 that has a new project manager – not 1635). Oswald will circle back with Westhill on this / note more data will be needed for risk analysis and for drill-down work. Summary sheet includes a long description related to data for this project, but it is in Westhill’s court. (The form has this error as well.)

7. Other items –
   a. Update on DEEP / NEEP M&V 2.0 Grant or other projects.

*** Supporting Materials in Box folder and attached before meeting, including:
• Updated Gantt Chart & Project Status Summary & data timeline report
• E-votes / call notes (attached / bottom of agenda)
• Draft RFP for review – just walking thru content; documents Tuesday
• Minutes (Dec)
• SERA Invoice - no
