Danbury Residents Show Commitment to Energy Efficiency at Light Bulb Swap

DANBURY, Conn. – February 2, 2017 – Nearly 700 Danbury residents recently participated in the city’s light bulb swap, where they exchanged over 3,500 incandescent light bulbs for new, energy-efficient ENERGY STAR® LED bulbs, free of charge.

Each Danbury resident who swapped out five of their home’s old, inefficient light bulbs is expected to save more than \$50 in annual energy costs. Combined, these residents will save approximately \$35,000 annually. Over the lifetime of the new LED bulbs, they will collectively save approximately \$805,000.

Energy experts from Eversource were on-hand at the light bulb swap to answer questions and provide information about additional opportunities to save money by making their homes more energy efficient, including information on the popular in-home service, [Home Energy SolutionsSM](#).

“Switching from incandescent to LED light bulbs is a great first step to improve your home’s energy efficiency,” said Eversource’s Energy Efficiency spokesman, Enoch Lenge. “We advise our customers to also consider Home Energy Solutions to discover what other changes can be made to save money and energy.”

Home Energy Solutions includes a home energy assessment and on-the-spot energy improvements performed by an Eversource-authorized contractor. The service is valued at an average of \$1,000, but only costs \$124; the fee is waived for income-eligible residents. A typical customer saves \$200 a year and will receive recommendations from their contractor for even more energy savings.

During Home Energy Solutions, Danbury residents will receive:

- Sealing around doors, windows, floor joists, and any other areas where air can escape (this service alone is valued at an average of \$600)
- Energy-saving LED light bulbs
- Health and safety tests on heating equipment
- Water-saving showerheads and faucet aerators, and hot water pipe wrap

- A report detailing your home's performance before and after the changes that includes educational tips and recommendations on how to further reduce home energy costs
- Information on rebates and financing for additional upgrades including insulation, windows, appliances, and heating and cooling equipment as applicable

The city is a participant in [Clean Energy Communities \(CEC\)](#), the nationally-recognized Energize Connecticut program that helps cities and towns save energy and increase the installation of renewable energy. Since signing the CEC pledge in 2014, Danbury has worked with Eversource to help the city reach its energy goals and reduce municipal building energy consumption by 20 percent by 2018.
