

“Seventeen thousand dollars in annual savings translates to a full scholarship for one of our programs or funding for a new medical lab, which are invaluable advances to keep us at the forefront of our industry.”

Joe Bierbaum, President & CEO of Stone Academy

Stone Academy is at the head of the class.

As a career training school, Stone Academy is constantly striving to provide a top-notch education. They pride themselves on offering rigorous programs and frontline experience for students. Stone Academy also leads by example within the educational community, both in and out of the classroom, with forward-thinking smart and sustainable business strategies.

With support from Energize Connecticut’s **Small Business Energy Advantage Program**, Stone Academy was able to implement energy upgrades at several of their campuses. Program engineers helped the academic institution with its ongoing sustainability efforts through a comprehensive project, including energy-efficient lighting and HVAC upgrades. Stone Academy also installed motion sensors to save energy on unoccupied spaces. Overall, they are saving nearly \$17,000 on energy costs annually.

Stone Academy also received a generous incentive fund from the Energy Efficiency Fund, making it possible for them to payback the full cost of the project in just three years.

- Project:** Stone Academy
- Measures:** Energy-efficient lighting upgrades
- Fund Incentive:** **\$30,240**
- Energy Savings:** **75,690 kWh** electricity/year
125 ccf natural gas/year
- Cost Savings:** **\$16,900** annually
