Mr. Garcia suggested that the Committee focus on joint program priority areas. ### 5. Strategic Objectives

a. **2015 Update to the 2013-15 C&LM Plan - highlights.** Mr. Gibbs provided highlights on the 2015 Plan Update. He noted that most of the C&LM programs had exceeded goals for 2014. Mr. Harrity commented that some of his relatives had had a very good experience with the HES program. Mr. Gibbs noted that the energy savings called for in the 3-year plan would result in avoiding the construction of a typical size power plant. Mr. Harrity noted the climate change benefits of energy efficiency.

b. **FY 2015-2016 Connecticut Green Bank Comprehensive Plan - highlights.** Mr. Garcia provided an overview of the Green Bank’s FY 2015-16 Plan. He noted that the C-PACE annual goal for this fiscal year had almost been achieved half way through the fiscal year. Mr. Hunter said that the demand for C-PACE is outstripping the capital available; therefore, they are in process of raising additional capital for C-PACE. He said they are expecting interest rates around 4%.

c. **Residential Financing Alignment document.** Mr. Kramer and Mr. Schlegel provided an overview. They noted that the high level purpose of showing this today is to illustrate that the EEB and Green Bank were coordinating on the deployment of residential financing products.

### 6. Areas of Joint Priorities for Financing

a. **Residential (HES Loan/CHIF Re-Capitalization, Smart-E Bundle, OBR, Residential PACE).** Ms. O’Neill provided a brief overview.

b. **C&I (C-PACE, SBEA, LBE).** Mr. Garcia and Mr. Kramer provided an overview. On SBEA, Mr. Gibbs provided a brief update on NU. Mr. McDonnell said that there was no update to provide on UIL. Mr. Garcia said that several ESPC projects are in the queue, and that overall $200 million in projects are possible if financing can be secured. He said that the Green Bank was working with the Attorney General’s Office and the Treasury to finalize a private capital solution. He said that the Green Bank was working with DEEP and the Companies to determine what an incentive structure should look like for ESPC projects. He said that the Green Bank had approved a fund to cover up-front costs for many projects that need it. Mr. Garcia also said that they were exploring the use of green bonds, which would be an alternative and/or supplemental to private capital.

c. **Multi-Family - Green Bank Low Income Housing Market Analysis and Financing Strategy.** Ms. O’Neill provided an overview. Ms. Glover commented that the multi-family market would be a slow growth market for the Green Bank, but that it was a priority for the Green Bank to try to help lower income populations. Mr. Harrity noted that 33% of CT is considered to be low-income. He said that an important goal of this program should be to create jobs. He also said he would like to see more renewable energy products manufactured in CT. Mr. Harrity commented that the Green Bank staff had great skills that could be put to work to solve this issue. Mr.
Garcia said that the Green Bank Board wanted the Bank to build on its success in other sectors, with the understanding that this market segment would see slow but steady growth. Mr. Garcia asked how the Green Bank and the EEB could collaborate on multi-family solutions. Ms. O'Neill said that we need to identify and assure the budget for this work; i.e., what can the CEEF budget support over the next 5 years?
