I. PURPOSE

The Clean Energy Finance and Investment Authority ("CEFIA") is seeking qualified Capital Providers ("CPs"). The Connecticut Microgrid Program is a $45M program administered by the Department of Energy and Environmental Protection ("DEEP") that provides grants for the interconnection of microgrid projects across the state. CEFIA will assist projects that have obtained DEEP grants in arranging public / private financing for the balance of the project cost. This RFQ will identify CPs interested in working with CEFIA and microgrid project stakeholders to structure and finance these projects.

II. CEFIA BACKGROUND

The nation’s first “Green Bank”, CEFIA was established by Connecticut’s General Assembly on July 1, 2011 as part of Public Act 11-80. This new quasi-public agency supersedes the former Connecticut Clean Energy Fund (CCEF). CEFIA’s mission is to help ensure Connecticut’s energy security and community prosperity by realizing its environmental and economic opportunities through clean energy finance and investments. CEFIA leverages public and private capital funds to drive investment and scale-up clean energy deployment in Connecticut. For more information about CEFIA, please visit www.ctcleanenergy.com.
III. DEEP BACKGROUND

The Connecticut Department of Energy and Environmental Protection (DEEP) is charged with conserving, improving and protecting the natural resources and the environment of the state of Connecticut as well as making cheaper, cleaner and more reliable energy available for the people and businesses of the state. The agency is also committed to playing a positive role in rebuilding Connecticut’s economy and creating jobs – and to fostering a sustainable and prosperous economic future for the state. DEEP was established on July 1, 2011 with the consolidation of the Department of Environmental Protection, the Department of Public Utility Control, and energy policy staff from other areas of state government. For more information on DEEP, please visit http://www.ct.gov/deep.

IV. CONNECTICUT MICROGRID PROGRAM OVERVIEW

CEFIA seeks to identify capital providers interested in supporting generating assets and “balance of system” costs for microgrid projects that have obtained grants through DEEP’s Connecticut Microgrid Program. Information on DEEP’s program is below:

The purpose of the Connecticut Microgrid Program (“Program”) is to solicit proposals from municipalities and developers to build microgrids in order to support critical facilities (as defined by Connecticut General Statues, Section 16-243y, as modified by Public Act 13-298, Section 34) during times of electricity grid outages.

Critical facilities are defined by the aforementioned Statute as “any hospital, police station, fire station, water treatment plant, sewage treatment plant, public shelter, [or] correctional facility or production and transmission facility of a television or radio station, whether broadcast, cable or satellite, licensed by the Federal Communications Commission, any commercial area of a municipality, a municipal center, as identified by the chief elected official of any municipality, or any other facility or area identified by the Department of Energy and Environmental Protection as critical.

The Program was developed in response to the recommendation of the Governor’s Two Storm Panel regarding the use of microgrids as a method for minimizing the impacts to critical infrastructure associated with emergencies, natural disasters, and other events when these cause the larger electricity grid to lose power.

DEEP is offering $45 million over three rounds ($15 million per round) to fund the design, engineering, wiring and interconnection costs for technically feasible
microgrids. The upper limit of funding to be awarded to an individual project is $3,000,000. Grants from DEEP cannot be used to cover projects’ generating assets.

During the first round of the Program, the nine chosen projects received grants ranging from $694,000 to $3,000,000, with approximately $20 million awarded in total.

For additional information on the Program, please visit http://www.ct.gov/deep/cwp/view.asp?a=4120&Q=508780

V. CEFIA ROLE IN MICROGRID FINANCING

CEFIA has already developed several financial programs that utilize private capital which microgrid applicants may leverage to finance the generation assets in their microgrid:

- **Commercial Property-Assessed Clean Energy (C-PACE):** C-PACE uses a benefit assessment on the generator host property (and beneficiary facilities of thermal energy in a thermal network) to secure 100% low-cost, long-term (up to 20 years) financing for clean energy upgrades. Project developers and CPs may learn more and submit an application at www.c-pace.com
  
  - **Eligibility:** Commercial, Industrial, Not-for-Profit, and Multifamily (>4 units)
  
- **Lead By Example:** State agencies and municipalities can take advantage of DEEP-provided technical assistance and utilize pre-qualified Energy Service Performance Contracting (ESPC) contractors and a standard ESPC process to install clean energy improvements at state and municipal government buildings at no upfront cost. The cost of the upgrades is repaid over time through energy savings, which are guaranteed by the ESPC contractor. CEFIA is actively assisting program participants with financing, which can include bonding, tax-exempt leasing, and other financing structures; it may also include participation by CEFIA.
  
  - **Eligibility:** State or Municipal Entities
  
- **Anaerobic Digestion:** CEFIA has an ongoing Anaerobic Digestion Pilot (AD) Program, a $5M fund with a rolling application process for loans or credit to support the financing of AD projects. Preference will be given to AD projects that process food waste. This program is applicable only to projects that are in the development phase, not those already under construction.
Individual awards are not a fixed amount based on size or cost and will vary based on the specific technology, efficiency and economics of the installation. However, the cost of such financial support will not exceed the equivalent of $450 per kilowatt generated up to 3MW. Financial support is intended to help the recipient achieve a fair and reasonable payback and return on investment, compared with purchasing the equivalent amount of power from the utility. Details and the application can be found at http://www.energizect.com/ad

- **Eligibility:** All types of properties considered
  AD only

**Combined Heat and Power:** CEFIA has an ongoing Combined Heat and Power (CHP) program (approximately $5M in funds remaining) designed to provide grants, loans, loan enhancements or power purchase incentives to offset the costs of commercial, industrial and institutional facilities interested in financing for their investments in CHP technologies.

The program covers many CHP technologies, including commercially available fuel cells, reciprocating engines, and gas and steam turbines. Only projects that are in the development phase may apply. CEFIA places a strong emphasis on evaluating the financing feasibility of each proposed installation, as well as the applicant’s ability to complete construction in a timely manner. Preference will be given to CHP projects that request either the loan/loan enhancement or power purchase incentive options.

Individual awards are not a fixed amount based on size or cost and will vary based on the specific technology, efficiency and economics of the installation. However, the cost of such financial support will not exceed the equivalent of $450 per kilowatt of nameplate rated capacity up to 5MW. Financial support is intended to help the recipient achieve a fair and reasonable payback and return on investment during the life of the project compared to purchasing the equivalent amount of power, fuel oil and/or gas from your utility. Details and the application can be found at http://www.energizect.com/chp

- **Eligibility:** All types of properties considered
  CHP only

Non-CEFIA programs that can support the financing / business model of microgrid projects:

- Power Purchase Agreement or Energy Services Agreement
- Net Metering
- Virtual Net Metering
- Renewable Energy Credits (LREC/ZREC, NEPOOL)
- Tax Incentives (ITC & MACRS)
For full program descriptions and more information on CEFIA’s partnership with DEEP, including a list of Frequently Asked Questions regarding microgrid project financing, visit www.energizect.com/microgrids.

Additionally, CEFIA may provide a small amount of direct financing to leverage additional third party financing for microgrid projects, via a $5M set-aside, particularly for the following technologies:
- Anaerobic Digestion
- Combined Heat and Power
- Solar Photovoltaic Systems
- Fuel Cells
- Storage and microgrid controls
- Energy Efficiency Improvements

These dedicated funds are intended for distribution amongst microgrid projects for credit enhancement in addition to CEFIA’s current financing products. CEFIA will develop participation jointly on a per-project basis and in consultation with participating capital providers, but may include subordinated or mezzanine debt or loan loss or other reserve.

CEFIA will work with CPs identified through this RFQ support the financing of generating assets and balance of system costs (those not covered by the DEEP grant) for:
- The nine (9) projects that obtained a Round 1 Grant. Of the $55.5 Million estimated total project cost for the nine (9) selected projects, DEEP issued $17.9 Million in grants.
- Projects that will obtain Round 2 and 3 Grants.

VI. SUBMISSION PROCESS

Required information used to identify projects of interest, but not used in evaluation of this RFQ:

1. Comment specifically on desired use and structure of credit enhancement mechanism(s) and/or subordinated debt provided by CEFIA for financing generation assets.
2. Describe what types of projects and/or technologies that your institution would like to work with.
   a. Are there any restrictions to types of projects and/or types of technologies?
3. Typical facilities/terms your institution offers for financing for generating assets:
   a. Basic structure, tenors (range), min/max sizes, prepayment options, preferred participation: sponsor equity, tax equity, project finance (senior/mezzanine), construction loans, etc.
   b. Typical required returns (range) and fee pricing
c. General underwriting guidelines, credit standards and security requirements

Following review of the final response submissions and approval of qualifications, CEFIA will contact respondents to schedule and undertake discussions on (i) development and clearance with the CP on marketing support, which may include posting information on CEFIA’s microgrid financing website and (ii) structuring of initial transactions.
